

Central Arizona Groundwater Replenishment District (CAGRD)

Rudy Fischer, CAWCD Board Member

Chris Brooks, CAGRD Senior Policy Analyst

Introduction to CAP: Central Arizona Groundwater Replenishment District (CAGRD)

- What is CAGRD?
- Relationship to CAP
- Importance of Groundwater Replenishment
- How does CAGRD work?
- Who are its Members?
- Plan of Operation
- CAGRD's Future Focus

What is CAGRD?

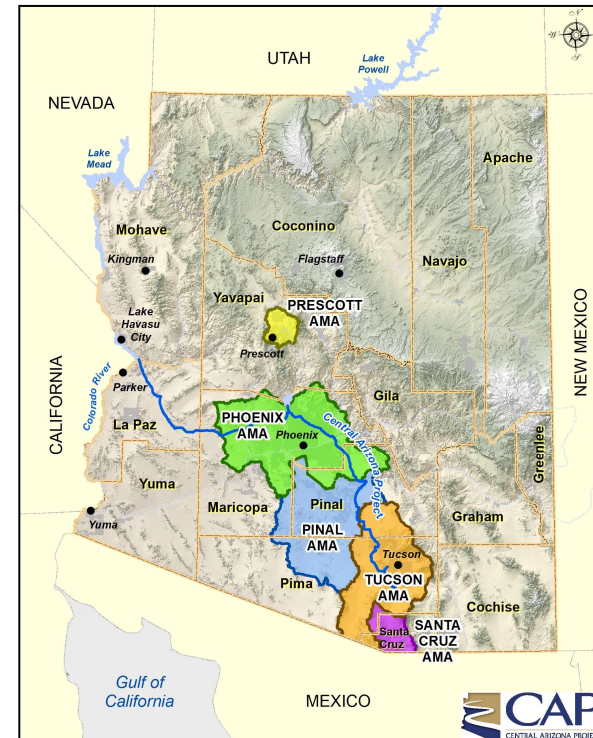

- **CAGRD** was created in the mid 1990s to help water providers and landowners comply with Arizona's groundwater management laws
- CAGRD plays an important role in Central Arizona's groundwater management by replenishing groundwater pumped by its members

Arizona Groundwater Management

1980 - Arizona passed the **Groundwater Management Act**, one of the most comprehensive groundwater laws in the country

- Regulated groundwater pumping in the most populated areas including Phoenix, Tucson, and Pinal
- Created the **Assured Water Supply Program**

CAGRD's Relationship to CAP

- Not a separate entity – a special function of CAP
- Governed by the CAWCD Board of Directors and serves members in Maricopa, Pima & Pinal counties
- Financially separate – funded solely by members

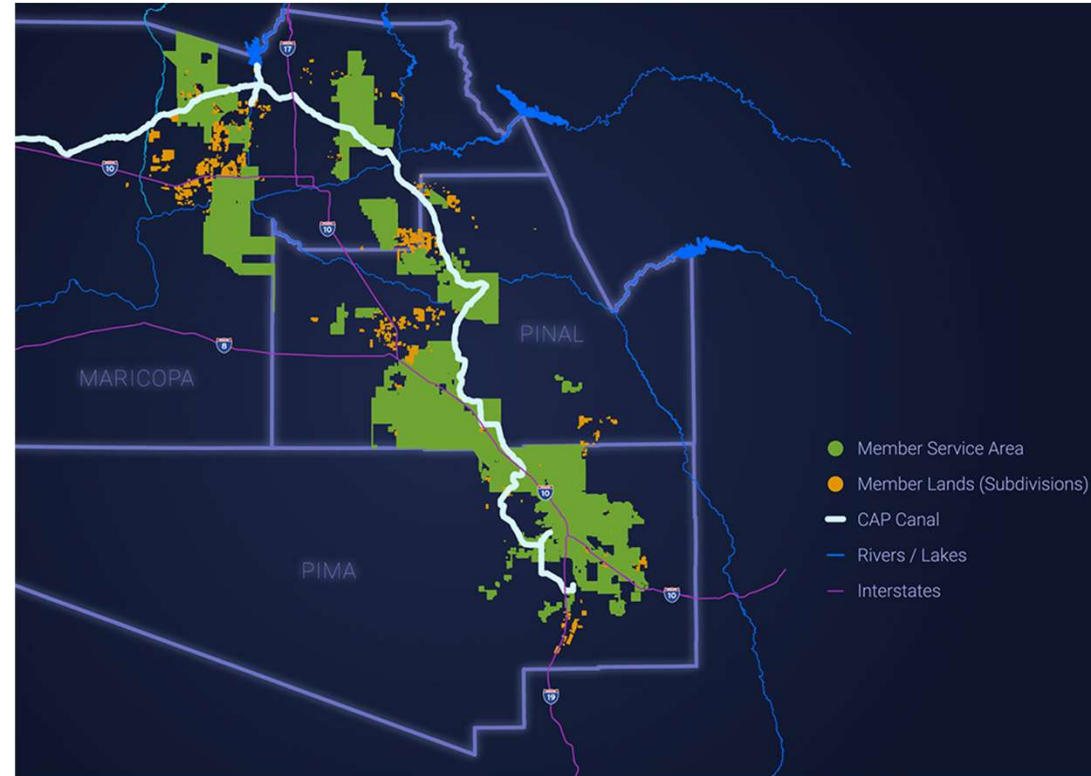

Superstition Mountains Recharge

Canal at Norterra Bridge

Who joins CAGRD?

Two types of members:

- **Member Service Areas**
 - City, town or private water company
 - Currently 24 enrolled Member Service Areas
- **Member Lands**
 - Subdivisions
 - Over 1,200 enrolled Member Lands

Groundwater Replenishment

- Aquifers are layers of sediment (silt, sand and gravel) beneath the ground that are saturated with water
- CAGRD replenishes aquifers through process of recharge
- It can also send water to farms who would have otherwise pumped groundwater

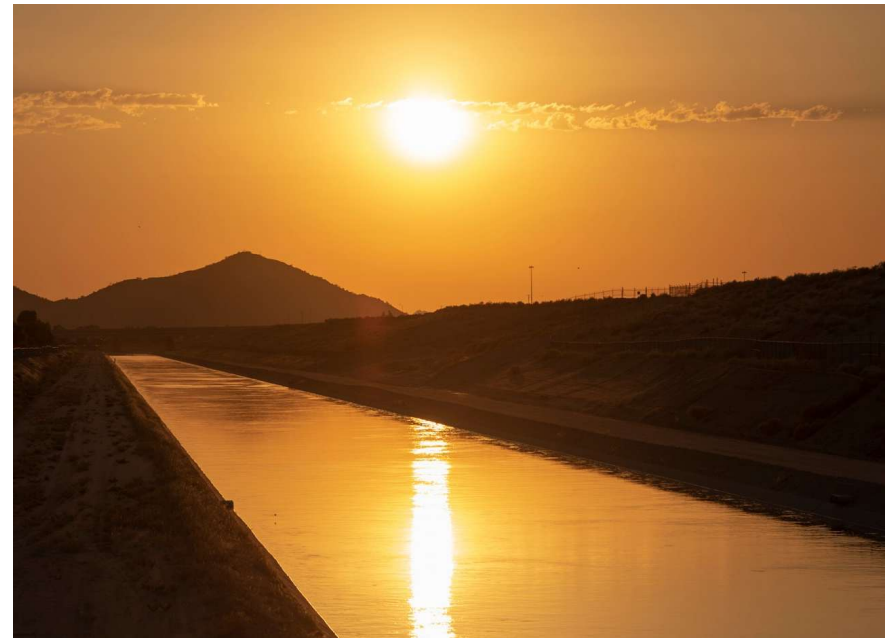

Hieroglyphic Mountains Recharge

CAGRD Water Supplies

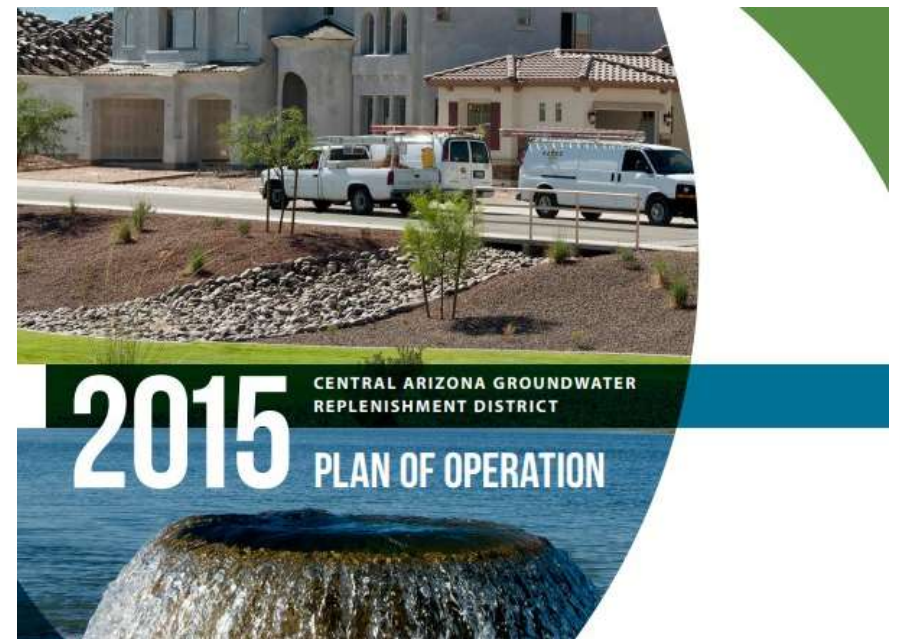

CAGRD's water portfolio includes:

- CAP allocation
- Effluent (recycled water)
- Leased CAP water
- Stored water

CAGRD Plan of Operation

- CAGRD operates under a 10-year Plan of Operation
- All plans have been developed with public input and have been approved by the ADWR
- Describes the projected obligations and water supplies for the next 100 years

CAGRD is Looking to the Future

- New 2025 Plan of Operation
- Participate on the **Water Use It Wisely** Steering Committee
- Incentivize water efficient homebuilding in CAGRD

CAGRD: Key Take-Aways

CAGRD:

- Plays an important role in Central Arizona's groundwater management by replenishing groundwater pumped by its members
- Is governed by the CAWCD Board of Directors and serves members in Maricopa, Pima & Pinal counties
- Replenishes groundwater through a process called recharge, which involves sending water to basins, where the water percolates through the soil to an aquifer, or to farms
- Is funded solely by its members

Thank you!
