**CAP**  
CENTRAL ARIZONA PROJECT

## **PRIORITY ISSUES**

### **Environmental Protection Agency (EPA) Rulemaking regarding Navajo Generating Station (NGS) Emissions Control**

Continue efforts to engage elected officials, stakeholders, and governmental agencies in influencing the EPA to apply due weight to the economic impacts of its BART determination for NGS.

### **Climate Change and Energy Legislation**

Monitor legislative efforts and respond appropriately to mitigate potential impacts on CAP operations and on the sale of Navajo surplus power.

## **ISSUES THAT REQUIRE CAP INVOLVEMENT WITH OTHER STAKEHOLDERS**

### **Post-2017 Hoover Power Reallocation**

Work with the appropriate stakeholders to seek final passage of this legislation.

### **Clean Water Restoration Act**

Continue to oppose expansion of the coverage of the Clean Water Act from “navigable waters of the United States” to “waters of the United States.”

### **Navajo/Hopi Water Rights Settlement Legislation**

Continue to seek a settlement of these water rights claims and support legislation necessary and appropriate to implement a settlement.

### **Salinity Control Funding**

Support federal funding of salinity control activities.

## **FEDERAL RULEMAKING**

### **EPA Rulemaking, Greenhouse Gas Emissions**

Monitor proposals to regulate greenhouse gas emissions from large facilities under the Clean Air Act.

### **EPA Rule, Hazardous Air Pollutants (HAP), Maximum Achievable Control Technology (MACT)**

Monitor development of the draft rule (due March 2011) and final rule (due November 2011) for potential impact on NGS. Rule development may continue into 2012.

### **EPA Final Rule, Drinking Water Contaminant Candidate List (CCL3)**

Monitor the implementation of the final rule on the Drinking Water Contaminant Candidate List 3.
